

# PMD RD1041Q

## 4 – Port Quad View DVI USB KVM

### Easiest Solution for Multitasking on various computers

Conventional KVM is designed to manage computers on a single monitor one at a time. But think different; why not manage all computers all-in-one-time? That's what PMD RD1041Q, 4–Port Quad View DVI USB KVM, is capable of: 4-in-1 Quad View, which is truly an effort and time-saving solution for admin who wishes to deal with multiple computers all together. The sturdy case and rack-mountable design makes it compatible with most environments: control rooms, server farms, security systems and etc. Available display modes are: Full Screen, Dual View, 3-in-1 Picture in Picture & 4-in-1 Quad View, providing ample choices per users' preference.

#### Dedicated Single View Monitor

Use as the main working view, this console will serve as your command center to integrate data on multiple systems, with high resolution digital resolution, audio / mic access, and keyboard / mouse interfaces. Dedicated Monitor simplifies your work without accidental changing system view as you create.

#### Multiple Display Modes

Display Mode selection includes following: Full Screen, Dual, 3-in-1 Picture in Picture & 4-in-1 Quad View. Its versatile application can match with every demand. Switch between above modes by Hotkey, OSD, or front panel Push Buttons.
